

FREE Post-16 support and professional development opportunities

AMSP offer a **range of professional development** and **student enrichment** opportunities to promote the study of Post-16 Maths Courses.

These include a mix of face-to-face, live online, on demand and sustained professional development courses as well as a wide variety of student enrichment events.

Contact martin.bamber@amsp.org.uk

Joint AMSP / Maths Hub events include KS5 teacher network meetings plus the summer North-West Regional Post-16 conference.

Maths Hubs offer a **Work Group model** of professional and school development for lead participation teachers who meet several times (equivalent to 3 days) over the school year. Each Work Group meets as part of a national project.

Participants keep in touch with each other between sessions to work collaboratively on an agreed focus.

The University of Liverpool Maths School offer a range of **outreach opportunities** for both students and teachers.

At KS5, specifically, there is an Aspiring Mathematician's Programme for students who are going on to study Mathematics at university, with a strong focus on entrance exam preparation.

Also, there are lots of online opportunities for students at KS4, including content delivery of Further Maths, advanced problem solving and support with GCSE Maths.
